Train for a career that will take you places

maritime.seattlecentral.edu
Real-world training for a career at sea

The Maritime Academy can help you launch an exciting career in a growing industry - here in the Pacific Northwest or around the world.

Programs
Choose from two different year-long, US Coast Guard-approved certificate programs that give you the skills to work as a professional mariner.

Both programs are full time and take place over three 11-week quarters, followed by a 90-day working internship at sea.

Enrolling
Please note, new students may enroll only in the fall quarter.

All classes are taught in person and feature:

Hands-on learning
Because the best way to learn is by doing.

The latest technology
You will use our state-of-the-art bridge and engine room simulators to practice challenges you’ll face on the job.

Training on vessels
Many classes are taught aboard our training vessels, where you will experience real-world situations.

At-sea internship
Your program ends with a 90-day internship on a working vessel, giving you the sea time and opportunity to practice your skills before transitioning into a full-time job.
